URGENT - Incitec Pivot Major Upgrades

From **Monday, 2nd December 2024 to Friday, 10th January 2025** all bagging of products (Bulka bags & 25kg bags) from Incitec Pivot will be closed due to a major upgrade of the bagging line at their Kooragang Island site.

For our customers we ask that you **consider your crop & fertiliser requirements from now until January/February** and orders are confirmed **prior** to shutdown. It would also be prudent to allow time for all your needs well into January/February, as there will likely be a significant lead time for orders once the plant reopens.

For more information ring Vicki or Jon at [02 6332 4044](tel:0263324044)

NEW COBBER RANGE!

The NEW Cobber range is even more inclusive, but don't worry, here at Town and Country Rural Supplies we will still be stocking your furry friends favourites!

- Working Dog
- Puppy
- Active - Now Adult with Beef
- Senior - Now Adult 7+

Mineral Deficiencies in Livestock this Spring

Deficiencies:

Magnesium: A deficiency can lead to grass tetany, especially in lactating cows

Phosphorus: Essential for vitamin B12 synthesis, cobalt deficiency can result in reduced appetite and reduced growth rates.

Copper: Necessary for several enzyme functions and overall health, copper deficiency can lead to anaemia and impaired immune response.

Product Recommendation:

Olsson's Beefmaster Lick Block: Specifically formulated to provide high levels of magnesium, this block helps prevent grass tetany and supports overall health.

Olsson's Superphos Lick Block: this product is rich in phosphorus and contains essential trace minerals like selenium and cobalt, supporting growth and reproductive performance.

Olsson's Trace Element plus Copper and Cobalt Lick Block: Aimed at ensuring adequate copper and cobalt intake, this block can help prevent deficiencies that impact growth and immune function.

SILVAN SELECTA POWER FIRE FIGHTING PUMP

The Silvan Selecta Power Water Transfer pumps handle high volume water pumping and are ideal when portability is needed or electrical power supply is scarce. This pump is made for fire fighting and other high volume hosing and it features a carry/mounting frame for mobility and added protection.

Pump Size (L/MIN): 250

Max Pressure: 7 Bar/100 psi

WHAT IS WEED STOP HERBICIDE?

ADD WEED STOP TO GLYPHOSATE TO CONTROL WEEDS FOR UP TO 9 MONTHS - SOIL ACTIVE WEED KILLER

Weed Stop is the ideal companion product to add to Evict Bio 360 and other glyphosate products. It forms a protective barrier in the soil which prevents most new weeds from emerging for up to 9 months after application. Use this product where maintaining bare ground is desirable.

Weed Stop Suitable for use on:

- Fence lines
- Gravel yards and driveways
- Industrial storage yards

TARGET WEEDS: Weed Stop controls certain annual and perennial weeds in commercial and industrial areas, around agricultural buildings, fence lines, rights of way.
