CYDECTIN®

PLATINUM

Dual Active LV Pour-on with DMI-Sorb™ Technology for Beef and Dairy Cattle

A highly effective broad spectrum pour-on for treating and controlling sensitive and single and dual resistant strains of gastrointestinal parasites in beef and dairy cattle (non-lactating).*

LEAVING WORMS BEHIND CAN SIGNIFICANTLY IMPACT PRODUCTIVITY

Independent trials^{2,3} have shown that Cydectin Platinum Dual Active Low Volume Pour-on is both highly effective against all key cattle worms and delivers a productivity advantage compared to older, single active pour-on drenches.

**NEW RESEARCH
CONFIRMS SIGNIFICANT
COST OF USING
INEFFECTIVE DRENCHES
ON HERD PERFORMANCE**

WHAT CATTLE PRODUCERS REALLY NEED TO KNOW

- TO PROTECT PRODUCTIVITY, ALWAYS USE A DRENCH WITH THE HIGHEST EFFICACY.
- CATTLE PRODUCERS NEED TO USE HIGHLY EFFECTIVE DRENCHES TO IMPROVE WORM CONTROL, DELAY RESISTANCE (EFFICACY) AND INCREASE PRODUCTIVITY (EXTRA WEIGHT GAIN).
- SINGLE ACTIVE POUR-ON DRENCHES ARE NO LONGER RELIABLY 'EFFECTIVE' EITHER IN EFFICACY AND/OR PRODUCTIVITY.
- CYDECTIN PLATINUM IS A HIGHLY EFFECTIVE DUAL-ACTIVE DRENCH, WITH THE BENEFITS YOU HAVE COME TO EXPECT — SHORT WHP AND ESI, NON-IRRITANT, CONVENIENT POUR-ON APPLICATION.
- CYDECTIN PLATINUM IS THE NEW STANDARD IN POUR-ON CATTLE DRENCH IN AUSTRALIA.

4th January - Regular Trading Hours Resume
Mon - Frid 8.00am-5.30pm, Saturday 8.00am -12.30pm**

Extinosad Aerosol is a convenient way to treat and prevent blowfly (*Lucilia cuprina*) strike, mulesing and other flesh injuries in sheep. A This ready-to-spray aerosol kills blowfly maggots (including OP resistant strains) with minimal risk to farm workers and livestock.

Extinosad Aerosol contains the powerful active ingredient spinosad. Spinosad has a unique mode of action which results in rapid knockdown of maggots, including maggot strains which are resistant to organophosphates. Extinosad Aerosol also contains an antiseptic to help prevent infection and a scourable blue colouring to assist with application.
